

The KANZ Field Power Desk™ is a portable desk with integrated power plant and charging provisions for various electronic devices.

This small package holds GoalZero® Sherpa 120 power packs and up to three 20W/hour solar panels. It can be powered by solar panels, small wind turbines, water wheels and other electricity generators.

Charging of the internal battery and electronic devices can also be done while driving a vehicle or from any 110/220V power source.

A designated charging tray, with a variety of output connectors, has a provision to hold small devices down and delivers a secure charging platform during transport and convenient access during employment.

This organized structure will store most 14 inch laptop computers, satellite internet router, DIN size radios and desk supplies. Specialty drawers for the secure storage of industry standard computer backup hard drives are available for photographer/videographer.

The table extension, the built-in desktop light and the included legs transform it to a small fully functional standing desk.

The detachable aluminum top lid can be folded back and provide space for an optional whiteboard.

Formed marine-quality aluminum combined with laminated birch plywood provides a sturdy structure in an aesthetical pleasing timeless industrial design.

True to our motto: "Living Without Walls", this mobile, powered desk unit allow you to work and play everywhere your life takes you.

Applications:

- Base camp communication station
- Emergency Preparedness
- Backup power
- Search and Rescue command center
- Campaign desk
- Radio communication station
- Overland Travel work desk
